Welcome to the Iowa Online AP Academy

It is our pleasure to welcome you to the Iowa Online AP Academy. This academy was started with a federal grant in 2001, with the goal of extending College Board, Advanced Placement course-taking opportunities to students in Iowa schools without such course offerings. Now, the program is generously funded with support from the state of Iowa, and we have expanded to include AP-preparatory courses for eligible middle school students.

Since the beginning of the program, one of the greatest strengths has been the personnel in the student’s home school district—that is, the administrators, site coordinators and mentors who go out of their way to make sure these above-level course offerings are available to their students and those who support students through this challenging academic endeavor.

I hope you find the contents of this handbook useful and encouraging as you continue to work to support your students in the Iowa Online AP Academy. If at any time we can help with the implementation of this program in your school, please do not hesitate to contact us with questions, comments, or concerns.

Thank you again for working with us to give your students this great opportunity!

Sincerely,

Kristin Flanary, M.A.
Iowa Online AP Academy Administrator
Belin-Blank Center
The University of Iowa

Ann Lupkowski-Shoplik, Ph.D.
Iowa Online AP Academy Administrator
Belin-Blank Center
The University of Iowa
Getting Started with the Iowa Online AP Academy

View our Getting Started Guide on our website (www.belinblank.org/ioapa), especially if you or your school are new to the Iowa Online AP Academy.

Policies and Requirements

A full list of the Iowa Online AP Academy’s policies and requirements is available on our website (see Policies & Requirements). Please be sure that all Iowa Online AP Academy students and school personnel are familiar with all policies, including eligibility, enrollment, and drop policies.

Eligibility

Schools are eligible to register for an Iowa Online AP Academy course if the course is not currently offered within the school district (or, in the case of middle school students, if the course is not offered at the student’s grade level). Please see our website for a full list of school eligibility requirements.

In order for high school students to be successful in IOAPA courses, they should be able to handle the academic rigor of a college-level course, as well as have the self-discipline and motivation necessary for an online course. Additionally, students should not be over-committed in their curricular and/or extracurricular activities. Review suggested prerequisites listed in the Course Catalog and each course’s associated link. We also suggest using pre-tests for AP Calculus AB, AP Chemistry, AP Physics B, and AP Statistics. For example, AP Computer Science A students will need to have taken Algebra I and Algebra II is recommended.

Consider using the Student Readiness Checklist (Appendix D) to help inform areas in which each student may need individual attention.

Middle school students are encouraged to participate in above-level testing in order to enroll in an IOAPA course. As of Fall 2022 this will be a requirement rather than a recommendation. Middle school students should score at the 90th percentile or above on a grade-level test (e.g., Iowa Assessments, ISAP) and at the 50th percentile or above on an above-level test (e.g., I-Excel for 6th-graders, ACT for 7th- and 8th-graders). Above-level testing can be arranged through the Belin-Blank Center, and funding may be available; go to www.belinblank.org/inschooltesting or contact the testing team (assessment@belinblank.org). Please see our website for a full list of middle school student eligibility guidelines (See Middle School Recommendations Guide).

Mentors for AP Computer Science Principles courses are not required to have prior computer science knowledge and/or experience. However, this course requires more time than other IOAPA courses. Project STEM provides curriculum, support, and resources. Most assignments are auto-graded. But the IOAPA mentor is required to grade some essay-type assignments. Any assignment that is not auto-graded will have a rubric available in the Teacher Resource Sidebar, which will be invaluable when evaluating the students' work. Also, help is available in the Teacher forum where Project STEM’s TA team can provide guidance about specific questions teachers may have.

Additionally, Project STEM (unlike APEX) is solely a curriculum provider for their courses. This means that AP Computer Science mentors will need to be listed as the teacher of record on the AP course audit. However, College Board does not allow the teacher of record and AP coordinator to be the same person. So, although our policies do not require that the two roles be filled by separate people, this will be necessary for any Project STEM courses. Therefore, schools where the same person usually fills the AP Coordinator and mentor roles will need to consider alternatives. Step-by-step instructions for completing these course audits can be found at the following links for AP Computer Science A and AP Computer Science Principles.

Registration and Student Enrollment Process

The entire registration process must be completed before students can enroll in Iowa Online AP Academy courses for the 2022-2023 school year. Schools must re-register each year.

Registration process:
1. **If you are registering 6th-8th graders**, the first step is to consider above-level testing. For more information, see the BESTS page, [here](#). If you are registering 9-12th graders, continue to step 2.

2. **Register your school and assign a site coordinator and mentor.**
   Principals are to register their schools on our website ([belinblank.org/ioapa](http://belinblank.org/ioapa); click on “Register Now”). As part of this step, schools agree to program requirements (see our [Policy Guide](#)) and assign a site coordinator and a mentor. Be sure to fill out and send in the [Mentor Designation Form](#) for the 2022-2023 school year (see [Appendix A](#)). This form is what enables mentors to receive a stipend.
   - Note: Middle school mentors can skip step 1 if the student has participated in above-level testing within the last two years.
   - Note: Schools may skip step 2 if they have already registered for the current academic year (i.e., when enrolling for spring semester courses if the school registered students for fall). Instead, start by clicking Register on our website. You will then be redirected to step 2 (student nomination).

3. **Nominate the student(s) taking IOAPA course(s).**
   Completing the school registration page sends the principal an automated email with a link in it to nominate the student. The principal either needs to complete the nomination or forward the link to the site coordinator or mentor to complete.

4. **Confirm that student has self-enrolled in the course.**
   Once the student has been nominated, an email will be automatically sent TO the student for the student to enroll themselves in the actual course. Be sure to have students check their junk mail folders, as the automated emails sometimes get filtered there. Students should complete this step and be sure to click submit when they’re done.

After registering, be sure to complete any College Board requirements for offering AP courses:

1. Register your school with the [College Board](#).
2. Complete the [AP Course Audit](#) process for offering Online/Distance Learning courses by **January 31** in order to be able to label courses as “AP” on students’ transcripts.
3. Encourage high school students to take the AP exam, and [order all AP exams](#) by **November 15**. Please note changes to ordering AP exams were implemented in the 2019-2020 academic year. See this [blog](#) for more information.

**Additional note on AP exam ordering**

AP Coordinators will need to order AP Exams for spring courses by **March 15, 2023**. Courses that began after November 13 are included in this deadline. This is also the deadline to make changes to existing orders (click [here](#) for instructions and check [here](#) for additional deadlines). Unfortunately, we cannot do this for your school; each school must order their own exams. However completing the process below, should ensure that schools are not charged fees for late orders. Below is an excerpt from page 65 of the [AP Coordinator Manual Part I](#).

**For Students Taking Courses That Begin After November 15**

There's not an option for a second-semester exam only section. You may have students from another school—for instance, a virtual school—who are taking an exam at your school but at the school they attend they're taking a corresponding course that begins after the November 15 final ordering deadline. You may need to submit the exam order for these students after November 15.

In this case, the student should be enrolled in both:

- The second-semester class section for the subject at the school they attend. The student's Order Exam? status should be **No** for this class section.

AND

- The exam only section for the subject at your school. The student's Order Exam? status should be **Yes** for this exam only section.
By being enrolled in both the exam only section and the second-semester class section for the subject, the late order fee isn't applied if you submit the exam order for this student after November 15.

BEST PRACTICE: Make sure the student is enrolled in both the second-semester class section at the school they attend and the exam only section for your school before you submit the student's exam order.

Setting Up Supports for Iowa Online AP Academy Mentors and Students
1. Note that we post useful information, resources, and contact information in the Being Successful and section of our website (www.belinblank.org/ioapa) and on our social media platforms (see Appendix B).
2. For help using IOAPA courses provided through Apex Learning, access Apex's FAQ and Help pages (available at: https://www.apexlearningvs.com/documents/ALVS_Standard_Policies_and_Procedures.pdf). Iowa Online AP Academy students and mentors should complete the Apex Learning certification before moving forward.
3. For help using IOAPA courses provided through Project STEM, access their help center here.
4. Bookmark the College Board’s calendar of important AP dates for the 2022-2023 school year if your students are enrolled in AP courses.
5. Mentors and high school students should review AP Course Descriptions on the College Board’s website.
6. High school students can find support for AP courses and exams, including sample questions, on the AP Students website.
7. Use social media to help support your students and teachers in the Iowa Online AP Academy. A list of social media supports for you and your students are listed in Appendix B.
8. If you are a veteran mentor or site coordinator, sign up to help new mentors and site coordinators as needed. Indicate your interest in this program by selecting this option on your Mentor Designation Form to be sent to the Belin-Blank Center.

Informing Students and Parents about AP and the Iowa Online AP Academy

Host an Iowa Online AP Academy Information Night
Consider hosting an Iowa Online AP Academy Information Night! Invite parents and students who might be interested in enrolling in the Iowa Online AP Academy to find out more about the program. Great times to host an information session are (1) in the middle of the fall semester, right before the spring course registration period begins, and/or (2) before the end of the school year, so that parents and students can consider signing up for full-year courses in time to meet the following fall semester’s enrollment deadline.

Some of our mentors have examples of Iowa Online AP Academy calendars available for students and parents to become more familiar with the expectations of academy work. If possible, provide sample textbooks and AP exams so students and parents can become familiar with the type of work they will be doing as part of the Iowa Online AP Academy. Provide students and parents with the course descriptions from College Board for the Iowa Online AP Academy courses your school will be offering. Show students and parents the Apex Learning and/or Project STEM websites. Invite past Iowa Online AP Academy participants and mentors to come to the information night to provide a first-hand account of their experiences. Also, be sure to include the benefits of enrolling in AP coursework while still in high school. Contact us at ioapa@belinblank.org for a PowerPoint template about the Iowa Online AP Academy for you to use at an Iowa Online AP Academy Information Night.
From an IOAPA Mentor: “I meet with all the students planning to take IOAPA courses in spring before they are enrolled. They are given a chance to review the textbooks for the course and sample materials. Prospective students (and their parents) are given material explaining the level of commitment required to be successful in AP courses and information about the benefits of AP.”

Setting Students Up for Success in the Iowa Online AP Academy
In order to set students up for success in the Iowa Online AP Academy, be sure to review all of the prerequisite requirements for AP courses offered through Apex Learning (see Appendix C).

Appendix D may be useful when trying to identify high school students who might be good candidates for upper level coursework in an online environment. It is important to note that even if students have the ability to complete the high-level coursework, some students struggle with the independence of an online environment. Using this checklist may be helpful in identifying potential problems for the students so that supports can be put in place.

Students should schedule their Iowa Online AP Academy course as part of their regular school day. Also, schools must provide each student with access to a computer, the course textbook, and all other course materials needed before the start of the course.

Helping Students Once They are Enrolled in the Iowa Online AP Academy

One of the biggest barriers for online students to overcome is the feeling of isolation from their instructor and from their peers also enrolled in online coursework. Through experiences with students in the Iowa Online AP Academy and an analysis of research related to high school students and online coursework, we identify four main concerns related to work in the Iowa Online AP Academy as well as possible solutions for those areas of concern. Apex Learning also offers a document titled “Best Practices for Helping Struggling Students Succeed.” This document can be accessed at: http://www.apexlearning.com/documents/BP_Helping_Stuggling_Students_Succeed.pdf.

Reaching Out to Classmates/Online Instructors Virtually
Although students enrolled in the Iowa Online AP Academy may not have another student in their school enrolled in the course, there are most certainly Iowa students enrolled in the course through the Iowa Online AP Academy, as well as students enrolled through Apex Learning from around the country. Apex Learning provides students with message boards to connect with other students enrolled in the same course. Encourage your students to make use of these boards as well as encouraging them to connect with other Iowa Online AP Academy students enrolled in the same course.

Similarly, mentors in the Iowa Online AP Academy should reach out to other mentors in the program. In the fall semester, we pair new mentors with veteran mentors who have volunteered to serve in a mentorship role for teachers as well. Mentors are also strongly encouraged to connect with the Apex Learning online course instructors.
From an IOAPA Mentor: “I frequently communicate with the IOAPA course instructors, sometimes to ask for help when a student is struggling but scared to ask, sometimes to explain site issues (late labs due to lack of school days due to weather issues, late arrival of required texts, etc.) I feel the better my relationship is with the instructors, the more I can help students navigate the sometimes challenging nuances of distance learning.”

Struggling with Content/Course Grades
When a student is struggling with course content, it is natural that the first person they might ask for assistance is the mentor in their school. While it is completely appropriate for the mentor to help answer questions if they are able, this is certainly not a requirement of the mentors in the Iowa Online AP Academy. The primary role of the mentor in the academy is to help support the student in their online learning environment, not to serve as an additional content expert. Iowa Online AP Academy mentors should help the student craft an email or phone conversation with their online instructor to address their question or point of confusion. The mentor should help facilitate this question/answer interaction between the instructor and the student; however, the mentor is not responsible for being knowledgeable about the subject the student is currently taking.

Interacting with the Online Instructor
While there are many advantages to having access to coursework online, one of the things students struggle with the most is establishing a relationship with their online course instructors. Many times, students are uncomfortable letting the instructor know of scheduling conflicts, asking questions about grades, or asking questions about course content. Mentors are asked to help students craft those emails and to help them pursue further questions, if necessary. If students do not understand an answer on a homework assignment, grade on a test, or grade on a paper, students are encouraged to contact their online instructor (or TA, when applicable) for further assistance. It is the expectation of the Iowa Online AP Academy and Apex Learning that student questions will be addressed by the instructor in a timely manner. Apex instructors have posted virtual office hours; however, if the office hours do not work in the student or mentor’s schedule, please contact the online instructor to set up another time to address questions/concerns.

Time Management
Schools and students are expected to schedule Iowa Online AP Academy courses into their regular school day—the academy courses are not meant to be “add-on” courses to a student’s already full schedule. In addition to scheduling Iowa Online AP Academy courses into the student’s regular school day, mentors are strongly encouraged to access student data to ensure that students are logging on and completing course assignments daily. The expectation for students enrolled in Iowa Online AP Academy courses is 5 – 6 hours per week outside of their scheduled course time for homework, readings, and preparing for tests and quizzes. Students enrolled in Iowa Online AP Academy lab courses will be expected to spend additional time in the lab.

The Belin-Blank Center will contact course mentors if a student has not logged on to their Iowa Online AP Academy course in more than 7 days. However, it is very difficult for a student to catch up on AP coursework once they fall more than 3 or 4 class periods behind. Mentors are strongly encouraged to follow up with both students and parents when a student starts to fall behind in their Iowa Online AP Academy coursework.

Requesting Extensions in Apex courses
Below is an excerpt from ALVS Standard Policies & Procedures
To request an extension for a student, an authorized school official can email ALVS Student Services at alvs.support@apexlearning.com and provide the student’s name, course name(s), and desired extension date. For help determining an extension date that does not exceed the maximum duration, mentors can call ALVS Student Services at 1-855-550-2547. Please submit extension requests before the final week of the course.

From an IOAPA Mentor: “I see my mentees every day and speak with them on a regular basis about their coursework. I also regularly check their progress and send the progress reports to them, their parents, and their counselors.”

From an IOAPA Mentor: “I watch the overdue activities section closely and contact both the student and the parent if that becomes a problem. My students are very busy, so I try to get them to look at the big picture and plan their IOAPA work around all their activities—just to keep them on schedule.”

Students Wanting to Drop Iowa Online AP Academy Courses

Over the last 10 years, the Iowa Online AP Academy has had student retention rates of 80% or higher. We know that this is largely due to the work of mentors with students in the school. Your expertise as both a licensed teacher in the state of Iowa and your personal relationships with students are a large part of the success of the Iowa Online AP Academy. If a situation arises in which a student requests to drop the course, we trust that the Iowa Online AP Academy mentor will do their best to make the most appropriate decision for that particular student. We strongly encourage students who might be experiencing difficulty with the course content or experience fear of a lower-than-expected grade to try to work through these issues with the help of their mentor(s) and course instructor(s). However, if a student decides to drop the course, the site mentor should contact the Belin-Blank Center to let the Center know about the change in enrollment status. Please do not attempt to drop the student yourself within the course platform.

It is important for students, parents, and school officials to understand that if a high school student chooses to drop an Iowa Online AP Academy course more than 14 school days after the start of course, the school will be assessed a $350 cancellation fee for each course they drop. Additionally, if a student is not active on their course for 21 consecutive school days, they will be dropped from the course and the school will be assessed the same $350 cancellation fee. This policy currently applies only to high school students and does not apply to middle school students.

More to Iowa Online AP Academy

AP Exam Scholarships
The Belin-Blank Center offers scholarships to pay for the cost of AP exams for low-income students in rural schools who are currently participating in IOAPA courses. The purpose of this funding is to increase the number of students taking AP exams from rural schools in Iowa. If schools are already paying for AP exams, they should not request this funding. Funding is only available for students who are taking an IOAPA AP course, and an AP exam in the same course.
IOAPA principals, site coordinators, and mentors can apply for this funding opportunity. Applications open prior to the deadline for both fall and spring AP exam ordering. The per-exam cost for the 2022-23 school year is $62 for students eligible for free/reduced cost lunch. Schools would pay the $62 per student to the College Board. Note this cost may vary, however the Belin-Blank Center will continue to match the College Board’s exam cost. To receive the scholarship, schools would submit an invoice to the Belin-Blank Center after students take the AP® exams along with documentation showing the school has paid the College Board for these students’ exams. There will be no reimbursement if a student does not take the exam.

Professional Development
The Belin-Blank Center also hosts AP training each summer for AP teachers on the University of Iowa campus. More information about AP teacher training can be found at http://belinblank.org/apsi.

Where to Go With Concerns or for Additional Help

If you have questions about enrolling students for Iowa Online AP Academy courses, accessing exams, or course deadlines, or need additional support, please contact IOAPA staff at the Belin-Blank Center (ioapa@belinblank.org).

Iowa Online AP Academy
ioapa@belinblank.org
(319) 335-6148

Apex Learning Courses
support@apexlearning.com

Course Materials, Extension policies, Help, and Resources:

If you have questions or concerns about an Apex Learning instructor, please contact Apex Learning directly at ALVS Services by either using the email address ALVS.support@apexlearning.com, or by calling 855-550-2547. ALVS Services will create a case, investigate the problem, document, and follow up with everyone involved. They will also escalate the complaint to appropriate management, if that’s what’s needed.

Live Help

Additionally, Edmentum offers an enhanced Live Help option to provide an additional layer of support for all ALVS students. When students are feeling stuck, need homework or lesson help, they can use Live Help to engage with a qualified teacher, Monday through Friday, from 8 am-5 pm Central Time, beginning August 15, 2022. During Live Help, students will use Zoom and can decide if they want to have their cameras on or off and if they prefer to chat, they can utilize the chat features in Zoom. Students can even share their screens to show their work and get the direct support from a qualified teacher in that subject area.

Students can access the Live Help function from their Genius dashboard. On their dashboard menu they should just click “External Links”. Then Click “Live Help 6-12” followed by the link for the Zoom help room for the respective subject area. The final step is completing an Entrance ticket for their desired topic of discussion. Visual instructions can also be found here.
AP Computer Science A Technical Requirements

AP Computer Science Principles Technical Requirements

CS Python Fundamentals Technical Requirements

Please note that our AP Computer Science courses require more of mentors than other IOAPA courses. See the Eligibility section of this handbook for more information.
Appendix A: 2022-2023 Mentor Designation Form

Mentors must complete this enrollment form in order to be designated as the mentor to receive the stipend at their schools. Only one designated mentor will receive an Iowa Online AP Academy stipend. The site coordinator can add other school-supported mentors, if needed. Site coordinators are responsible for adding the mentors to the “Staff” tab in the Apex dashboard. Fax or email this form to Dominic Balestrieri-Fox (fax: 319-335-5151; ioapa@belinblank.org).

Mentor information:
Mentor Name: ___________________________________________________________
Folder Number: __________________________
Mailing Address: _________________________________________________________
City: _______________________________ State: __________________ ZIP: ________

Please list the courses for which you are mentoring students in the **Fall 22**: _______________________________
________________________________________________________________________________________

Please list the courses for which you are mentoring students that **begin in Spring 23**: ________________________
________________________________________________________________________________________

Agreement of Commitment:
Please initial next to each line.

______ I certify that I am currently a licensed teacher in an accredited public or private middle school or high school in Iowa that is registered through the Iowa Online AP Academy.
As our school’s assigned mentor, I agree to the roles and tasks to actively support our students participating in the Iowa Online AP Academy courses. These tasks include proctoring all quizzes and tests.

I am the designated Iowa Online AP Academy Mentor and I understand I will receive a stipend for each semester for which I am the designated, active mentor for 2022-2023.

I would like to (mark one):
☐ serve as a mentor for new IOAPA mentors
☐ be mentored by a veteran IOAPA mentor
☐ none of the above

Mentor Signature: _______________________________ Date: ________________

Site Coordinator Signature: _______________________________ Date: ________________

Principal Signature: _______________________________ Date: ________________
Appendix B: Online and Social Media Resources

Follow your AP instructor or other IOAPA mentors via Twitter, if they have an account! You can also follow @APforStudents and @AP_Trevor for AP updates.
Appendix C: Iowa Online AP Academy Courses and Prerequisites

Course descriptions, syllabi, and suggested prerequisites can be accessed through the Course Catalog page of our website (www.belinblank.org/ioapa). Find the class you are interested in, and click Learn More.

Courses include AP courses for high school students and high school-level courses for eligible middle school students. Middle school courses are not AP courses; rather, they are AP-preparatory, intended to equip students with sufficient skills and background knowledge to be prepared for future AP courses in high school. For help solving middle school course implementation issues, the links here will be useful.
Appendix D: Iowa Online AP Academy Student Readiness Checklist  
(Adapted from the Project Excel Teacher Recommendation Form developed by Hoffman Estates High School)

Prospective high school IOAPA students and mentors should fill this out together.

Please indicate your perspective on the following information below:
1 – Weakness  2 – Average  3 – Strength

School Work Habits/Independent Functioning
___ Homework Completion
___ Self-Advocacy Skills
___ Organizational Skills
___ Note-Taking Skills
___ Willingness to Access Resources (i.e. tutoring, teacher assistance, etc.)
___ Class Preparedness
___ Class Participation

Classroom Function Behaviors/Motivation
___ Ability to Stay Focused
___ Ability to Stay on Task
___ Desire to Do Well
___ Attempts All Tasks Assigned
___ Takes Responsibility for Own Learning

Each person has relative strengths and weaknesses. In addition to having taken the appropriate prerequisite courses, the above characteristics may be important for a successful experience in the Iowa Online AP Academy. Please discuss the areas that you or your mentor have identified as areas of weakness. How will you address these areas, as they relate to your participation in the Iowa Online AP Academy?
Appendix E: Applying AP™ Exam Scores at Area Colleges & Universities

Enrollment in AP™ coursework can be applied to many college and university graduation requirements. The table below shows the AP™ exam scores required to earn college credit and/or advanced standing at selected colleges and universities in the Midwest. Qualifying scores may transfer as elective credit hours, or they may replace an introductory level course in the content area, depending on the score, the institution, and the department.

This information was updated on October 21, 2021, from Office of Admissions websites. Check with the Office of Admissions at your institution of interest to be sure this information is accurate and to determine how credit will be applied, especially for the AP Computer Science courses.
